Our Client

A top 10 CPG company with global operations in over 10 countries.

Key Business Needs

- Extend beyond BI and **integrate actionable insights** into operations
- Find solutions to **improve maintenance performance** and time to resolution
- Improve the **quality of inventory data** for their internal data catalog
- **Reduce duplicate spend** across business units
- **Drive consistency** in inventory management & process across all regions

Business Challenge

- Visibility into materials inventory across disparate systems and data types
- Creating organizational alignment
- Improving asset reliability
- Increasing productivity
- Driving cost savings

Solution

With the Verusen solution, our client gained the **visibility** they needed to better understand their **MRO materials** across 6 global zones, enabling them to drive **organizational alignment and engineered reliability**.

The identification of **cost saving and cost avoidance** opportunities allowed this client to more **strategically purchase materials** without **risking production uptime**.
