Fortune 500 Energy Company

Verusen helps Fortune 500 Energy company verify $20M in savings opportunities in less than 45 days

**Our Client**

Fortune 500 energy company that provides gas and electric services to residential and commercial properties

**Key Business Needs**

- Experienced significant growth through M&A activity, resulting in a lack of visibility into materials inventory.
- Unable to optimize inventory and eliminate excess working capital, they needed a solution that combines data and inventory optimization into a single platform.

**Business Challenge**

- Consolidate business unit data
- Ability to audit part inventory reviews
- Harmonize & structure data
- Analyze historical data
- Enable actionable insights

**Solution**

Bypassing a lengthy and costly data harmonization project, Verusen quickly provided a single view of inventory across all business units.

This unified view helped the organization to better achieve and optimize the economies of scale desired from their M&A growth strategy, identifying over $40M in savings opportunity.
